Foundlings and Charity Patients in N. Y. Hospitals Experimented Upon.

GIVEN VILE DISEASES

Rockefeller Institute Surgeons Inocculate Tots with Germs of Plague. Many Cases Are Uncovered.

New York, Feb. 12.-Foundlings, orhans, and charity patients of the public spitals and institutions of New York City have been supplied to Dr. Hideye Noguchi, of the Rockefeller Institute, and

Noguchi, of the Rockefeller Institute, and other medical research surgeons as subjects for vivisection experiments, according to facts uncovered today.

Michael Joseph Whitty, of the American Institute of Social Service, charges that humans have been inoculated with germs of a vile disease and other seruma at the Rockefeller Institute and at hospitals owned and supported by the taxpayers of New York City.

Names of physicians and hospitals are cited and the charges are backed by official reports signed by Dr. Noguchi and other scientific experts.

Inoculated 1,000 Children.

Inoculated 1,000 Children.

Here are some of the concrete evidences of the use of human beings as subjects for scientific experiments: 1. Dr. Lemmet Holt, professor of dis-eases of children in the college of physi-cians and surgeons, Columbia Univer-sity, applied tuberculin tests to 1,000 young children, who were ward patients

writes over his own signature, "were over three years of age, the majority being under two years."

"Tests Are Harmless."

3. Dr. Martin Cohen, of Harlem Hospital, Randalls Island Asylum, and the New York Opthalmic and Aural Institute, used Dr. Noguchi's "leutin emulsion," which is the extract of the germs of the most dreaded of contagious diseases, on fifty patients suffering from minor aliments. In his report, Dr. Cohen says: "Thus far the test has been absolutely harmless in 170 cases which were innoculated during the last five months."

4. Dr. Noguchi used, in a series of similar experiments, 148 healthy persons, ilar experiments, 146 healthy persons, part of whom were children between the ages of two and eighteen. He reports that these tests were made at "different hospitals and dispensaries with the co-

hospitals and dispensaries with the cooperation of the physicians in charge."
"Children in our hospitals and other
public institutions," said Mr. Whitty,
"are being used by the physicians for
experiments by innoculation of vaccines,
serums, &c., which have nothing whatever to do with the disease or illness
from which they were suffering. The from which they were suffering. The victims of these experiments do not know what is being done to them, and the consent of the parents and guardians of the children who are charity patients

"Human beings have been innoculated with serums which have added much to their sufferings, and sometimes resulted in permanent injury, and which have had no relation to their particular illness. They have been sprayed in the throat or nose, or made to breathe the poisons of diphtheria, smallpox, scarlet fever, an consumption. They have been in lated with virus of foot and mout case and made to inhale the breath of scarlet fever patients."

eases of children in the college of physicians and surgeons, Columbia University, applied tuberculin tests to 1,000 young children, who were ward patients in the bables' hospital.

"Very few of the children," Dr. Holt writes over his own signature, "were frankly in honor of those who had been White House social functions, being given frankly in honor of those who had been associated with Mr. Wilson's political fortunes. The reception was deprived of much of its pleasure because of the absence of the President, who lay in bed in

being under two years."

Summing up the result of these experiments, Dr. Holt said:
"Dying children or those who were extremely sick did not, as a rule, react to any of the tests."

2 Two children, among many who were subjected to the same tests, doveloped the vilest of all contagious diseases, after leaving Willard Parker Hospital, where they were innoculated with a serum as an experiment.
